JUL 21 1947
LIBRARY

RESTRICTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

WEEKLY MORBIDITY REPORT

RESTRICTED

CURRENT TRENDS Week Ending 1 June 1946

A substantial decrease in admission rate for All Causes is apparent this week, as the curve reaches the lowest level of the year. Overall, the morbidity picture is more favorable than at anytime since Oct 1945. The current rate of 562 is 11% below last week, and decidedly below the rate of 645 which prevailed during the corresponding week of 1945. The decrease is distributed through nine of the districts, with the greatest improvement in the 5th and 11th Districts. Each of these districts experienced a 20% drop from its previous week's above average rate. The highest rate of the week is again exhibited by the 9th District, with a rate of 830, which is somewhat lower than the previous weeks 844.

The general improvement in morbidity is reflected in the rate for Total Respiratory Diseases with a 20% reduction from 124.1 last week to 98.3 for the current period. A year ago the rate was 176. The improvement is widely distributed. In the 9th District, where incidence has been high for some time, the current rate of 231.1 is 15% lower than last week's rate. The 9th District continues at a figure nearly double that of the second highest district. The Potomac and Severn River Commands again show the lowest rate in the country, with only 38.

CATARRHAL FEVER, ACUTE, AND INFLUENZA. Rates for these diseases are continuing to show a downward trend. The current figure of 50.7 represents a 10% reduction from last week, and is less than half the rate of 115.3 that was experienced a year ago. The highest rate for any district is 82.8, reported from the 9th District. With the exception of the 9th District, every district with an above average rate last week experienced a distinct improvement. The 7th District shows the lowest rate, with 18.1.

PNEUMONIA, BRONCHO AND LOBAR. The rate for these diseases remains at a relatively low level, with a current figure of 1.4 compared to 1.5 last week and 2.0 for the corresponding week in 1945. Only four districts report any incidence of these diseases, compared with eight districts reporting cases last week. The 11th District has the highest incidence with a rate of 4.8.

PNEUMONIA, ATYPICAL. An increase is noted for this disease, with a current rate of 2.6, which is compared to 2.1 last week and 3.0 a year ago. The 11th District, which has previously reported the highest incidence, experienced a reduction in rate from 8.1 to 6.9, but still accounts for nearly half of the cases in the entire country. The remaining cases were distributed among seven other districts. The highest rate per 1,000 was 8.3, reported by the 6th District.

TONSILLITIS AND PHARYNGITIS. The rate for these diseases shows a decided drop of 33%, from 64.4 last week to 43.5. This compares with a rate of 56 for the corresponding week of last year. All Districts with above average rates last week experienced a decrease. The most dramatic fall is reported by the 5th District, where the rate dropped from 92.9 to 19.5, a reduction of nearly 80%. The highest rate is 144.2, reported by the 9th District, in keeping with the high overall rate there.

SCARLET FEVER. There is a rise in rate for this disease, the current figure of 6.9 representing an increase of 13% over last weeks 6.1. A year ago the rate was 8.0. All of the new cases occurred in the 5th, 9th, 11th and 12th District. The 9th District is highest, with a rate of 21.3, which is 53% above the rate there last week. The 11th District experienced a rise of 17% to 13.9, while the 5th District showed a 20% decrease.

MEASLES. This disease shows a declining rate, the current figure of 6.8 standing 30% below last week's rate. A year ago the rate was 2.0. With the declining overall rate there is a wider distribution of cases, nine districts reporting incidence as compared with six districts last week. While the 11th District still accounts for more than half of the total cases, its rate was cut in half this week, dropping from 48.6 to 24.5.
